

No problem. We'll rebuild test data from zero.

Step 0 — make sure backend is running

Terminal:

```
cd "C:\Users\BANUJAN\Documents\Codex\2026-04-27\i-want-to-build-a-full-2\backend"
```

```
npm run dev
```

Keep it open. Must show:

MongoDB connected

API running on port 4000

Step 1 — create barber

Postman:

POST

<http://localhost:4000/api/auth/signup>

Body → raw → JSON:

```
{  
  "name": "Test Barber",  
  "phone": "0770000001",  
  "password": "123456",  
  "role": "barber"  
}
```

Copy the returned token.

Step 2 — create salon

Postman:

POST

<http://localhost:4000/api/salons>

Authorization tab:

Type: Bearer Token

Token: paste barber token

Body:

```
{  
  "name": "Akeepan Salon",  
  "address": "Jaffna",  
  "phone": "0771234567"  
}
```

Copy returned salon _id.

Step 3 — create service

Postman:

POST

http://localhost:4000/api/services

Authorization: same barber token.

Body:

```
{  
  "salon_id": "PASTE_SALON_ID",  
  "name": "Hair Cut",  
  "price": 1000,  
  "duration": 30  
}
```

Copy returned service _id.

Step 4 — create customer

Postman:

POST

http://localhost:4000/api/auth/signup

Body:

```
{  
  "name": "Test Customer",  
  "phone": "0779999999",  
  "password": "123456",  
  "role": "customer"  
}
```

Copy returned customer token.

Step 5 — book appointment

Postman:

POST

<http://localhost:4000/api/bookings>

Authorization:

Type: Bearer Token

Token: paste customer token

Step 3 — Use this Customer not Salon token for booking

Go back to booking request:

👉 Authorization → Bearer Token → paste **customer token**

Body:

```
{  
  "salon_id": "PASTE_SALON_ID",  
  "service_id": "PASTE_SERVICE_ID",  
  "date": "2026-04-28",  
  "start_time": "10:00"  
}
```

Go to MongoDB Compass:

salon_booking_lk → services

Copy the service document _id, then use it for service_id:

Expected: booking status confirmed.

Step 6 — check availability

Postman:

GET

`http://localhost:4000/api/salons/69ef87d145da8e866bf789fc/availability?date=2026-04-28&service_id= PASTE_SERVICE_ID`

Expected: 10:00 and 10:15 should not appear.

Step 7 — check MongoDB Compass

Refresh these collections:

users

salons

services

bookings

bookinglocks

You should see all new records.
